

## Index A

### The QualityTime-ESL Tree Structure

These pages are intended to give you a quick overview of how the Document Annex is constructed, i.e. its plan. As you browse it, we hope you will find files that interest you. In that case just copy the name of the file and place it in the search window of the finder on your computer to locate the file.

*Many files are often found in both PDF and MS Word. This is to help you see what the intended layout was meant to be, in case you have an operating system that does not replicate the original layout. You may in that case have to make a few adjustments.*
